Training "Public Tenders- Advanced"

Being subject to the public procurement regime in Belgium for almost 7 years now, hospitals starting to get accustomed to public procurement procedures, yet (practical) problems remain when tendering in the medical devices sector.

This training will focus on the current practical problems in tender procedures for medical devices, as well as on recent developments and case law concerning, amongst others, technical minimum requirements, selection criteria and awarding criteria.

In particular, this training will address items such as FAMHP Circular 646 and anti-gift rules, samples, value-based procurement, improvement proposals, commercial secrecy, price revision and much more. It will also touch upon what to do after awarding, where to look in the awarding report and which options are available to challenge awarding decisions.

The presentation will be followed by a Q&A.
